

FPSA, Innovative & Responsible company, is now engage in a global project

Concerned to conciliate our objectives of development, social harmony and environmental protection, we are constantly looking to ensure the financial sustainability of our company. **We are in a continuous improvement process in order to satisfy interested parties**

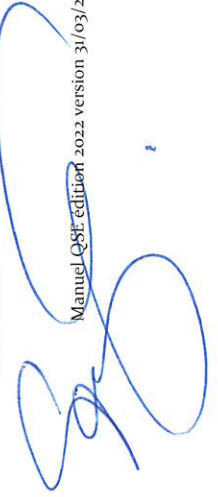

More specifically and in link with our global strategy, our main axes of work are :

- ✓ We must maintain the trust and satisfaction of our customers
- ✓ We are committed to maintaining certifications ISO 9001, 14001, 13485 and IATF16949
- ✓ We seek to innovate in the development of our products taking into account the impact on the environment and customer needs
- ✓ Our products must be of high quality, we must anticipate and looking for solutions to problems
- ✓ We are looking to improve the performance of our productions
- ✓ The staff is constantly awarded and trained to improve their skills and respect our rules
- ✓ Internal and External communication need to be improved
- ✓ We take care of environment by a good sorting and recycling our waste
- ✓ Be conform with reglementary and legal requirements
- ✓ Look for energy saving on our every day life and in our means of production purchases

We delegate management of the quality management system to the **Quality System Manager**. He'll be the guaranteed of the implementation, efficiency and well understanding of this axes. To measure a good apply of the system, indicator and objectives are defined and follow during all the year.
